Profile

Innovative Computer Science Engineering student with expertise in Python, Django, and SQL. Proven ability to develop end-to-end web applications. A highly adaptable professional with excellent communication skills and a background in collaborative environments, seeking to solve real-world challenges in an industry setting.

Education

CGPA-8.6 , Vignana Bharathi Institute of Technology	2022 – Present Hyderabad
Percentage-98.3% , Narayana Junior College	2020 – 2022 Hyderabad
GPA-10.0 , Narayana E-Techno School	2020 Hyderabad

Projects

Python Secure Password Generator

Robust command-line utility in Python engineered to generate cryptographically strong, randomized passwords, significantly enhancing digital security practices. This project involved implementing user-configurable parameters for precise control, utilized Python's built-in random and string modules, ensuring high entropy and optimal character distribution.

Real-Time Stock Price Tracker

Developed a full-stack web application for real-time stock price tracking and visualization. Features a Python Flask backend for fetching and processing live market data from a financial API, and an HTML, CSS, and JavaScript frontend providing a dynamic, responsive UI for stock search, current prices, and basic trend observation. Demonstrates proficiency in server-side logic, interactive web development, and asynchronous data fetching.

Donation and Adoption Hub

Hope & Home is a centralized full-stack web application built with Python, Django, and React.js to streamline resource management between donors and welfare organizations. Featuring a robust **SQL** architecture, the platform integrates real-time tracking, role-based access control, and secure data handling to ensure transparency and engagement. Developed through collaborative teamwork, the project highlights a scalable architecture and modern security protocols, successfully demonstrated through a comprehensive technical walkthrough.

Skills

Languages — Python, SQL, JavaScript, C, HTML/CSS

Frameworks & Tools — Django, React.js, Figma, Git/GitHub

Developer Skills — Full-Stack Web Development, Database Design, Responsive UI Design

Communication — Strong verbal & written skills, content writing, storytelling

Interests

Competitive Programming — Participating in Hackathons, Ideathons

Reading — Following industry trends and publications

Participating in Group discussions — Debates, Clubs

Certificates

- ServiceNow Certified System Administrator (CSA)
